Work Experience

Python & Django Training   **June 2023 - July 2023**
Cipher Schools

- **Mastered** Python and Django, **independently** developing a comprehensive **Polls Application project** with a **robust admin interface** for managing poll questions and choices.
- Created **a dynamic Polls Application** showcasing **full-stack proficiency** in HTML, CSS, Python, and SQL, with an intuitive and **responsive frontend design** that enhances **user experience and interface usability**.
- Implemented **efficient backend features** including **models** for questions and choices, **views** for listing questions and displaying details, **handling** user votes, and **configuring URL routing for seamless navigation**.

NGO Work   **June 2022 - July 2022**
Jeevan Jyoti NGO

- **Implemented** educational programs to boost primary school attendance and **educate** parents on the benefits of education and government-provided facilities
- **Organized workshops** for students to promote regular school attendance and **conducted sessions** for parents on the importance of education.
- **Collaborated with community leaders** to **organize events** emphasizing educational benefits, leading to increased school attendance and community engagement.

Projects

Meme Generator / *ReactJS, Figma, Responsive Web Design*   **May 2024 - Jun 2024**

- Created a responsive Meme Generator in ReactJS with robust state management, asynchronous API integration for dynamic meme fetching, intuitive user interactions, and deployed on Vercel for optimal performance and availability.
- Github Repository Link: **https://github.com/Tasmii/Meme-Generator**

Your Meal App / *React-Native, Responsive Cross Platform Design*   **Feb 2024 - Mar 2024**

- Developed a cross-platform React Native app prioritizing user experience, implemented React Navigation for seamless navigation, and integrated third-party APIs and community-driven libraries for dynamic features.
- Github Repository Link: **https://github.com/Tasmii/Your-Meal**

Portfolio Website | Web Development / *HTML5, CSS3, Javascript, Response Web Design*   **Dec 2023 - Jan 2024**

- Crafted a dynamic portfolio website using HTML, CSS, and JS with captivating animations, implemented a user-friendly contact form for seamless communication, and enhanced user experience with customizable dark/light themes and JavaScript-based color-changing functionality.
- Github Repository Link: **https://github.com/Tasmii/Portfolio-Website**

Certificates

Bitcoin and Blockchain Technologies | *Coursera*	**Feb 2024**
The Complete Data Structure and Algorithms Course in Python | *Udemy*	**Dec 2023**
The Complete Web Development Bootcamp | *Udemy*	**Nov 2023**

Technical Skills

Languages: Python, Java, JavaScript

Web Technologies: HTML5, CSS3, React JS, Node JS, Express JS, Django, React-Native

Data Management: MongoDB, MySQL

Others: Git & GitHub, UI & UX Designing, Figma
